Technical Lead

PROFILE • ABOUT ME

5+ years of experience in facilitating cutting edge solutions to a wide range of web, mobile & desktop applications. Proven ability to leverage full-stack knowledge and experience in building scalable & interactive websites/mobile apps for wider industry domains from medical, games to education, e-commerce, etc. Extensive expertise in managing, guiding, and leading the technical team.

CAREER HIGHLIGHTS

My career demonstrates proven work in:

- Creating interactive, user-centric, and responsive web & mobile applications.
- Proven knowledge of working with PSD.
- Managing and leading the entire technical team.
- Hands-on experience in the most demanding tech stacks: JQuery, Bootstrap 4, HTML, CSS, SASS, Javascript, ReactJS, React-Native, Flutter, Dart, Node.js, MongoDB, MySQL, and Angular.
- Profound experience in developing a SPA (single page application) in Angular & ReactJS.
- Responsible for planning, designing, leading, and executing technical solutions, find errors, and make appropriate improvements.
- Direct engagement with the client to understand the business requirement.
- Implement the best practices and coding standards of the projects.

PROJECTS

Project

Period:

Project Type:

Legacy Fantasy Sports

July 2020 - Current

Daily Fantasy Game

Technologies: React-Native, Angular, Angular-Material, Java, MYSQL, NodeJs, MongoDB, AWS, Microservices.

Team Size: 15

Role: Tech Lead

Client: US Client

LFS is an American daily fantasy sports contest and sports betting operator. The company allows users to enter daily and weekly fantasy sports-related contests and win money based on individual player performances in American sports NFL. Where users can create their own lineup and play the game, and win the prize as per the defined prize structure.

Project **ACOB (Assembly of Canonical Orthodox Bishops)**

Period: May 2020 - Current

Technologies: React-Native, Angular, Angular-Material, Java, MYSQL, NodeJs, MongoDB, AWS, Microservices.

Team Size: 8

Role: Tech Lead

Client: US Client

Project Type: Survey

ACOB is an easy-to-use application for users, which has two-part, admin, and user. The user part is a mobile application where they can give the answer to the survey question regarding their experience of churches. And on the other side, we have admin, where admin users can create the survey and target the filtered user. In the admin portal, we have a survey, users, roles, notifications, and inbox module. So the admin user can organize surveys, create users, and push notifications to the end-users.

Project **Gomedii**

Period: March 2016 - Current

Project Type: Ecommerce

Technologies: Angular, Angular-Material, Java, MYSQL, NodeJs, MongoDB, AWS, Microservices.
